

# Regional Community Health Improvement Planning

## What is a Regional CHIP?

The Partnership for Community Health will be organizing health improvement work around a regional Community Health Improvement Plan (CHIP).

### A Regional Community Health Improvement Plan is:

- A plan with priorities, goals, strategies, and measures that guide Linn, Benton, and Lincoln county health improvement efforts.
- Actions to improve the health of our whole community, with special attention to issues of health equity.
- Developed with qualitative and quantitative data, community values and voices.
- A living document that gets renewed on a three-year cycle.

## Data brief sources

---

Most of the data in the briefs come from the 2022 Regional Health Assessment, which relies on many different sources. Other sources include:

- **Community Health Survey** of people who live, work, learn and play in Linn, Benton, and Lincoln counties (2,000 responses).
- **Focus Groups** with diverse community members and partner organizations (11 interviews).
- **Key Informant Interviews** with a diverse set of community-based and cultural organizations, decision-makers, and others (31 interviews).

We would also like to extend a special thanks to our numerous regional community partners for their contributions to the data collection process. Please see updated list in the Regional Health Assessment.
